ACCESSORIES

Bronze Bump Ring - add to the motor adapter to make pump suitable for hazardous areas.

SiC Dri-Coat (for shaft and bushings) is ideal protection for applications where the pump may see unintentional, brief periods of dry running.

Baseplate - fabricated of steel or fiberglass for extra strength and rigidity. Suitable for grouting. Shown with optional bearing frame.

M20 Power Monitor - Shuts the pump down when there is a drop in power to prevent run dry damage.
