## **Features**

- Air filled, Class F insulated, heavy duty motor, rated for 20 starts/hour, dissipates heat easily, operates cooler with higher efficiencies; longer service life with lower operating costs
- Built in motor protection with autocut protects motor against overheat, out of phase, single phasing, and no load; saves money on costly motor replacement
- Molded cable prevents capillary action, reduces maintenance costs by replacing only the cable rather than the motor
- 60,000 hour bearings ensure long dependable operation; lower maintenance costs
- Large solids handling capabilities prevents clogging
- Semi-open impellers; offer the best design for handling stringy and/or abrasive materials better due to large wear area and open passageways, providing durability and longer life
- High quality stainless steel shaft; provides high tensile strength, corrosion resistance, longer life, and lower maintenance costs
- **Double mechanical seals** silicon carbide lower seals, carbon/ceramic upper - hard faced upper and lower seals operate in an oil bath; providing longer service life and lower maintenance costs
- High wire to water efficiencies reduced power consumption, reduced cost of operation
- Available for slide rail installations provides ease of maintenance for small sump type installations
