EXPERTS IN PUMP TECHNOLOGY

OUR PRINCIPLES. OUR VISION.

OUR PASSION.

For over 40 years, we have pursued a single goal: to find the best pumping solution for our customers. To achieve this goal, we constantly improve our progressive cavity pumps, macerators and control systems, bring international patents to market and continuously adapt our products to our customers' needs. If the best solution for a customer doesn't exist yet, we'll create it!

This passion has helped drive us to the top, from our beginning in 1972 as a small operation in the heart of Germany's Ruhr region to our current status as a global leader in pump technology.

Our financial success, highly motivated staff and many satisfied customers – all of these things are the result of our corporate culture and personal convictions, the way we look at things, how we treat one another, how we face challenges and what we hope to achieve in the future.

Let's take a closer look at our principles and vision.

SEEPEX. All things flow.

RESPONSIBILITY.

We take responsibility for our customers and staff. This responsibility is reflected in all our business relationships, because we treat one another with respect.

We are also aware of our responsibility to the environment. Through our products and services, we are helping to continuously improve our living and working conditions and preserve our habitat.

As part of our day to day operations, we handle the earth's resources with care, use energy and raw materials efficiently and recycle or dispose of our waste in an environmentally friendly manner.

TRADITION.

Customer satisfaction is part of our tradition.

Since our founding in 1972, our main goal at SEEPEX has been to ensure our customers' satisfaction. Today, we continue to develop products that meet their exact needs and requirements. Our commitment does not end with delivery but extends to providing excellent service, ensuring a long and efficient service life for our pumps.

Throughout our history, our team has had a single goal in mind: to find the best pumping solution for the customer. This remains our goal for the future as well.

INNOVATION.

More than 40 years ago, the first SEEPEX progressive cavity pump showed the power of our innovation, and that same strength continues to set us apart today.

Since that time, we have developed and successfully marketed a large number of technical innovations in pump technology, many of which are patented internationally. Our various innovations and developments contribute considerably to more efficient, economical and environmentally friendly workflows and processes for our customers.

We promote innovation in all areas of our company and encourage our employees to contribute their suggestions and ideas. Our innovative strength helps us maintain our leading position in technology, service and customization.

SUCCESS.

We will continue on our path of profitable growth and ensure the survival and further expansion of our business over the long term.

We continuously expand our market position by tapping new markets and application areas. We invest in modern technologies in production and logistics. We accelerate our processes, boost our profitability and ensure the highest quality.

Our goals are profitable growth, high customer satisfaction, high efficiency, continuous innovation and a stable supply chain. We work continuously to strengthen and consolidate our position as a global leader in pump technology.

CUSTOMER ORIENTED.

We provide our customers with personalized, detailed, competent advice. We deliver solutions that are precisely tailored to their needs, industry and medium. We are a reliable partner to our customers and seek to build long-term relationships with them.

We want our customers to get the best value for their money. Therefore, we provide top-quality products and also meet their specialized needs through custom solutions.

In short: we pull out all the stops for our customers. All things flow.

SERVICE.

We are far more than just a pump manufacturer. We also understand what it takes to provide excellent service. This means offering customers a first-class service portfolio that we are continuously expanding. Our customers benefit from maximum process reliability, low life-cycle costs and long-term value. We ensure that SEEPEX pumps operate for many years as efficiently and economically as possible.

Whether it's through consulting, commissioning or maintenance, we support our customers in a competent, thorough manner for the entire service life of the pump.

QUALITY.

SEPEX is synonymous with high quality. We deliver customers top technology. Our pumps meet the highest requirements for reliability and durability.

By maintaining ISO 9001, ISO 14001 and ISO 45001, we ensure that our high quality standards are met at all times and that we can identify and implement potential improvements quickly.

CORPORATE CULTURE.

At SEEPEX, we respect one another and are open to constructive criticism. We utilize the skills of each individual to achieve the best results possible.

SEEPEX is successful because our staff members are highly motivated and possess important qualities: competence, initiative, customer/goal orientation, commitment and accountability. One of our management's key roles is to support and promote these qualities.

Together, we create a climate in which motivation, loyalty, initiative and team spirit thrive.
