

Reliable dosing of chemicals

Solenoid diaphragm dosing pumps play an important role in the reliable and accurate dosing of liquids.

Lutz-Jesco metering pumps are specifically designed for water treatment and the process industry.

Wide range of applications

The MAGDOS LK is available in seven sizes for metering applications ranging to 3.96 gph with back pressures up to 232 psig. Double-ball valves ensure accurate, consistent dosing. The dosing rate can be adjusted by changing the stroke frequency manually or via external control contact.

Several different materials and connections are available for wetted-end components. By using appropriate and recommended materials, the MAGDOS LK can be used in a wide variety of process applications.

Matching accessory sets with tubing, injection nozzles and suction lines allow quick installation and reliable operation.

Simple to use and space-saving

Thanks to the sturdy, low-maintenance solenoid drive, the media being supplied (for example acids, alkalis, coagulants and flocculants) is reliably and accurately dosed.

The combination of the MAGDOS LK's solid design and the easy-to-use digital controls allow for short set up times and efficient operation.

The compact design and the small footprint allow for easy integration into dosing systems even for installations with limited space available.

Wall mounting is possible provided the check valves remain in a vertical orientation by rotating the head.

In Short

- Capacity range to 3.96 gph, up to 232 psig
- Power supply 110 VAC or 230 VAC, 50/60 Hz
- Multi-language menu support
- Easy-logic menu controls with graphical display guidance
- Calibration functionality
- Multi-unit capacity indication
- Eco-operation settings
- Integrated vented head (standard on plastic version)
- Wall and floor mounting possible without a bracket
- Double-ball valves ensure accurate dosing
- Materials available: PVC (standard), PP, PVDF and Stainless Steel
- Material consistency for pumps and accessories
- Dosing heads and valves for high-viscosity media are available

Technical Data

MAGDOS LK			05	1	2	4	6	10	15
Delivery capacity at max. pressure	gph		0.09	0.20	0.50	0.89	1.64	2.40	3.43
	ml/stroke		0.05	0.05	0.2	0.31	0.57	0.83	0.86
Max. supply pressure	psig		232				116	87	43
Delivery capacity at medium pressure	gph		0.14	0.29	0.61	1.00	1.80	2.64	3.96
	ml/stroke		0.08	0.07	0.24	0.35	0.63	0.92	1.0
Average back pressure	psig		116				58	43	14
Max. stroke frequency	SPM		120	250	160	180			250
Suction head for non-gassing media	ft H ₂ O		16		9		6		
Max. supply pressure	psig		11 PSI						
Nominal valve width			DN3		DN4				
Voltage supply			230 V AC +/- 10%, 50/60 Hz or 115 V AC +/- 10%, 50/60 Hz						
Power consumption	W		8	13	19	25			22
Protection class			IP 65 (with covering caps on the connections)						
Insulation class			F						
Weight	PVC, PP, PVDF	lb	~ 7.0						
	Stainless Steel		~ 9.5						
Max. ambient temperature	°F		Stainless Steel/PVDF 113° (104° with PVC parts)						
Max. temperature of the medium	°F		Stainless Steel/PVDF 176° (with PVC parts 95°; with PP parts 140°)						

Flow Curves

The flow curves are valid for ambient temperatures of 68°F (20°C) and dosing water at 100% stroke frequency. The delivery capacities depend on the medium (density and viscosity) and temperature.

Dimensions

MAGDOS LK with dosing head made of PVC, PP or PVDF

MAGDOS LK with dosing head made of stainless steel

Material	Size	L
PVC, PP, PVDF	1/4" x 3/8"	1.34"
	1/4" x 7/16"	1.34"
	1/4" FNPT	1.34"
1.4571 / PVDF	1/4" FNPT	1.96"
	1/4" FNPT	2.12"

Accessories

Even the best pump can be improved – simply by the addition of appropriate accessories.

Suitable sets of accessories, consisting of suction/discharge tubing, foot valve and injection nozzle, are available for the dosing pumps.

To turn your dosing pump into an efficient dosing system, we recommend using the following accessories:

- Injection nozzles - to dose the medium into the main line and to prevent it from flowing back into the pressure line
- Back pressure and pressure relief valves - to increase dosing accuracy or to protect the system against excessive pressure
- Pulsation dampener - to dampen supply flow as well as to reduce discharge flow pulsations
- Priming aids - to significantly ease priming of dosing pumps with low supply volumes per stroke, for large suction heights, highly viscous dosing media, for initial priming or when priming after the system has been idle
- Suction pressure regulator - to prevent medium flow when the dosing pump is not running or to prevent a vacuum being formed in the event of a pipe failure

Please contact us for more information on accessories and metering pump systems.
