IR Ingersoll Rand[®]

ARO® Lubrication Equipment.

For over 85 years, the ARO® Fluid Products business of Ingersoll Rand® has developed relationships with more than 200 original equipment manufacturers and distributors, enabling us to better focus on the unique pumping needs of many industries. It is a strategic merger of our customers' application expertise, along with our decades-long legacy of designing and building outstanding piston and diaphragm pumps.

ARO® delivers unmatched dependability and productivity with a full range of lubrication products built to a global quality standard to keep all types of fluids moving efficiently.

ARO® offers a versatile range of piston and diaphragm pumps capable of meeting the specific needs of your applications. Available in multiple sizes and configurations with a broad selection of pressure ratios and displacement rates, our pumps can help unlock superior performance and increase production across a number of unique applications.

Lubrication Equipment Warranty

ARO® lubrication equipment is built with the finest materials to deliver reliable products with extended durability. Our warranty is your assurance of a quality product.

Features

- ▶ Piston pumps for grease — or for motor oil, gear oil, and transmission fluid
- ▶ No lubrication or complex controls required
- ▶ Digital / metered fluid control handles are precise and easy to use
- ▶ High-pressure grease control handles
- ▶ Full range of general lubrication fittings and accessories

Application advantages of ARO® lubrication pumps:

Transfer & Supply: ARO® lubrication pumps are designed to move high volumes of fluids in order to minimize time spent filling or emptying large containers.

Lubrication: ARO® lubrication pumps offer a variety of flow rates and pressures to meet your need in moving oil and grease to lubricate equipment and machinery.

Used for:

- ▶ Material Transfer
- ▶ Vehicle Service
- ▶ Mining and Construction Equipment
- ▶ General Machinery

ARO® Piston Pumps and Packages for Oil and Grease

ARO® lubrication pumps deliver unmatched industrial-strength performance and are sized to fit any container - large (275-gal/400-lb, 1040.9 L / 181.4 kg) to small (5-gal/35-lb, 18.9 L/15.9 kg).

They pump motor and gear oils, transmission fluid, and standard and industrial greases. Pumps are offered from 3:1 to 100:1 ratios in order to meet the requirements of any application - commercial vehicle servicing to lubricating heavy mining equipment.

Saving You Time and Money

Our simple pump designs allow service by any owner or qualified technician.

► Reliable Performance:

- Patented design improves flow, reduces pulsation and extends service life
- Various size motors can produce the right pressure for any application

► Durability:

- ARO® stand behind its pumps with a 5-year warranty
- Stall-free motor is contained in a rugged housing

► Low Maintenance Time and Cost:

- Can service pumps in-line with no special tools required
- Fewer parts than comparable pumps mean easier servicing, reduced service time
- No air line lubrication required

612041-1

1:1 ratio pump ideal for pumping motor oil, gear oil, and transmission fluid. This model fits a standard 55-gal (208.2 L) drum (including bung adaptor).

612042-1

1:1 ratio piston pumps are ideal for moving oils and fluids at high volumes. This model is designed for 275 obround tanks.

AF0409

AF0409 Series pumps are designed with a 9:1 pump ratio, 4-1/4" (108 mm) air motor, and are ideal for pumping heavy oils over long distances.

Piston Pump Accessories

Model	Description	For use with
5-GAL CONTAINERS		
65986	Siphon tube has 6' (1.8 m) long, 3/4" (19 mm) ID hose with 3/4" (1.9 cm) NPT (M) outlet; hose is neoprene over Thiokol and includes 91020-1 tube.	Wall-mounted stub pumps
55-GAL CONTAINERS		
65986-1	Siphon tube has 6' (1.8 m) long, 3/4" (19 mm) ID hose with 3/4" (1.9 cm) NPT (M) outlet; hose is neoprene over Thiokol.	Drum cover for closed drum w/ 2" (50.8 mm) bung opening
61601	Speeds 55-gal (208.2 L) drum change-over. No need to handle pump. Includes 622651-06 hose, Y45-24-C adapter bushing, Y43-5-C street elbow, and 65109 (36" long, 914 mm) carbon steel suction tube; 3/4" (19 mm) NPT(F) fluid outlet.	Wall-mounted stub pumps
66779	For pumping from 55-gal (208.2 L) drum. PVC tube has foot valve for positive priming. Includes 76193 bung adapter, adjustable to approximately 35-1/2" (902 mm); 1" (25.4 mm) NPT (F) fluid outlet.	Stub pumps and diaphragm pumps
61409	For pumping from 55-gal (208.2 L) drum. 90° PVC siphon tube, 35-1/2" (902 mm) long with 2" bung adapter for 55-gal drums. Can easily be cut to desired length, on site; 1/2" (12.7 mm) NPT (F) outlet.	1/2" diaphragm pumps and stub pumps
91020-2	1/2" (12.7 mm) galvanized suction tube for 55-gal (208.2 liter) containers; 36" long (914 mm).	
275-GAL CONTAINERS		
66779-2	For pumping from 275-gal (1040.9 L) tanks. PVC diaphragm tube has foot valve for positive priming. Includes 76193 bung adapter, adjustable to approximately 48-1/4" (1232 mm). 1" (25.4 mm) NPT (F) fluid outlet.	Stub pumps and pumps

Diaphragm Pumps

3/8" – 2" (9.5 MM – 50.8 MM) FLUID PORTS

**PUMP SUPPLY
INCORPORATED**

Why ARO® diaphragm pumps?

Our diaphragm pumps are ideal for pumping oil or other light fluids such as antifreeze, water, windshield fluid, fuel (See UL 79 Approved Units), solvents, transmission fluid, and waste oil. Fluid ports for Ingersoll Rand / ARO® diaphragm pumps range in size from 3/8" to 2" (9.5 to 51 mm) to meet the requirements of any application.

- ✔ Safety — Bolted fasteners prevent fluid leaks harmful to workers and the environment
- ✔ Reliability — Unbalanced valve design eliminates valve centering and pump stall-outs, even under low air inlet pressure
- ✔ Flexibility — Variety of body materials allow you to pump different fluids
- ✔ Commitment — Ingersoll Rand / ARO® diaphragm pumps come with a five-year warranty

1 Bolted construction for safe reliability and ease of assembly

All Ingersoll Rand / ARO® diaphragm pumps use bolted construction that process professionals demand. Ingersoll Rand / ARO® non-metallic diaphragm pumps also utilize fasteners that are constructed of 300 Series stainless steel for maximum chemical resistance.

- ✔ Bolted is safer — Bolted construction reduces the risk of spills and environmental contamination, and the attendant, mandatory reports to regulatory agencies that spills can create.
- ✔ Bolted is reliable — Bolted construction withstands the heavy loading that diaphragm pumps are subjected to, without concerns about breakage or loosening.
- ✔ Bolted is easier to assemble — Our bolted design allows for easy positioning and alignment of parts during reassembly. This is a significant advantage over band-clamp style pump fasteners, which are difficult to align and hold together during reassembly.
- ✔ Bolted is less expensive — This design uses standard bolts that cost significantly less to replace. Non-standard fastening devices (such as band clamps) are considered wear parts and are more expensive to replace.

2 Positive priming provides instant start-ups

Check valves are located close to the diaphragm chambers, ensuring a positive prime.

3 Ideal for abrasion and solids-handling

Because Ingersoll Rand / ARO® diaphragm pumps do not use the rotating, sliding seals found in rotary and centrifugal pumps, they're used by more process engineers to handle tough abrasion applications.

4 Broad material selection

Ingersoll Rand / ARO® offers a wide selection of materials, allowing your choice of the best possible wetted and non-wetted materials suited to your application.

5 Ingersoll Rand / ARO® patented unbalanced air valve

Our unbalanced air valve design makes all Ingersoll Rand / ARO® diaphragm pumps unSTALLable. Because the unbalanced valve cannot settle in a neutral position when the pump is shut down, it can't become stuck, requiring the operator to hammer on the pump in order to start up again.

- ✔ Eliminates stalling
- ✔ Uses significantly less power than competition
- ✔ Does not require lubrication
- ✔ Forgiving in dirty air

This 1:1 ratio pump has dual inlets to allow simultaneous pumping and blending of antifreeze and water.

613201-2-C Calcium Chloride Tire-fill Pump Package

Designed for the purpose of evacuating and filling tires with calcium chloride ballast solution. Package includes a 666100-441-C, 1" (25.4 mm) port diaphragm pump. Aluminum construction with neoprene diaphragms and PTFE checks for compatibility with corrosive calcium chloride and 60154 hose / strainer / gun assembly. Also includes check valve and all required clamps and related hardware.

650717-C U.L. approved Fuel Pump

Designed specifically for high-volume transfer, bulk-unloading, or fueling applications. These pumps meet UL 79 specification code and are compatible with gasoline, aviation fuel, diesel fuel, fuel oil and kerosene.

Pro-Series Drum Diaphragm Pumps

Drum Pumps

- ARO® Drum Pumps are available in three body materials for optimum fluid compatibility: choose from aluminum, stainless steel or polypropylene body construction.

Drum Pump Packages

- Package Components Factory-Matched – ARO® Drum Pump package components contain pre-specified, matching materials of construction for complete fluid compatibility

Drum Pump Packages can be ordered in 3 styles:

- Basic: Pump, bung adapter, air safety shut-off, siphon tube, weather seal, and base
- Complete / Transfer: basic pump plus fluid hose or fluid hose with non-drip nozzle
- Complete / Dispensing: basic pump plus foot valve, hose and dispensing nozzle

Pump Features

- 11-gpm (13.4 l/m) flow capability: drum pumps offer plenty of capacity to satisfy a broad range of transfer application volume demands
- Stall-free operation: ARO® diaphragm drum pumps feature a patented unbalanced air valve design that avoids stall-out, even under low air-inlet pressures
- Bolted construction: ARO® diaphragm drum pumps utilize bolted fasteners for leak-tight integrity
- 5-year warranty

Protect your investment

Pump run away happens when a material container is depleted and the pump cycles fast and needlessly. It's not good. So, protect your pump investment with an ARO-STOP® valve.

In selecting a hose, be sure the hose material is compatible with the fluid being pumped and that the maximum working pressure will not be exceeded in the application. Only those hose length options listed with each model are available. Substitute -XX with -5, -15, -25, etc., to indicate length selection. (Example: Substitute -XX with length selection, such as -50. If length is single digit, use that digit only. Do not add zeros.)

***CAUTION: These hoses cannot be used with 100:1 ratio pumps.**

Never use a hose with a maximum pressure rating lower than the highest pressure the pump can generate.

Warranty

AIR SYSTEMS COMPONENTS AND LUBRICATION EQUIPMENT

Air Systems Components Warranty

Ingersoll Rand® Fluid Products warrants to the original-use purchaser of the Ingersoll Rand® / ARO® air systems components depicted in this catalog that Ingersoll Rand® will repair or replace, free of charges, including return shipping costs within the continental United States of America, any such product that under normal use and service proves defective in material or workmanship, as determined by Ingersoll Rand inspection, two years from date of purchase, provided the claimed defective product, or part thereof, is promptly returned to the Ingersoll Rand® Service Repair Center or a factory-authorized service repair center, with transportation charges prepaid.

If Ingersoll Rand® inspection discloses no defect in material or workmanship, repair or replacement and return will be made at customary charges.

The foregoing warranty supersedes, voids, and is in lieu of all or any other warranties, expressed or implied, and no warranty of merchantability or fitness for particular purpose is intended or made. The sole obligation of Ingersoll Rand® and the sole remedy of the original-use purchaser is as stated above and in no event shall Ingersoll Rand® be liable for any special, direct, indirect, incidental, consequential; or other damages or expenses of any nature including, without limitation, loss of profits or production time incurred by the original-use purchaser or any other party.

Lubrication Equipment Warranty

Ingersoll Rand® warrants to the original-use purchaser of the products depicted in this catalog that Ingersoll Rand® will repair or replace, free of charges, including return shipping costs within the continental United States of America, any such product that under normal use and service proves defective in material and workmanship, as determined by Ingersoll Rand® inspection, within (A) one year from date of purchase of said products, other than the following, (B) five years from date of purchase of LM and LP Series pumps, (C) five years from date of purchase of a diaphragm pump, and (D) five years from date of purchase of Ingersoll Rand / ARO®-manufactured swivels, non-metered control handles, 4-1/4", 6", 8" pumps, drains, follower plates, tie-downs, siphon tubes, and drum covers, provided the claimed defective product, or part thereof, is promptly returned to the Ingersoll Rand® factory or Customer Service Center with transportation charges prepaid.

This warranty does not cover failure of parts or components due to normal wear or damage, or wear that in the judgement of Ingersoll Rand® / ARO® arises from misuse, abrasion, corrosion, negligence, accident, substitution of non-Ingersoll Rand® / ARO® parts, faulty installation, or tampering.

If Ingersoll Rand® inspection discloses no defect in material or workmanship, repair or replacement and return will be made at customary charges.

Equipment not covered by Ingersoll Rand® warranty: accessories or components of equipment sold by Ingersoll Rand that are not manufactured by Ingersoll Rand® (such as switches, hoses, meters, etc.) are subject to the warranty, if any, of their manufacturer. Ingersoll Rand® will provide the purchaser with reasonable assistance in making such claims.

The foregoing warranty supersedes, voids, and is in lieu of all or any other warranties, expressed or implied, and no warranty of merchantability or fitness for particular purpose is intended or made. The sole obligation of Ingersoll Rand® and the sole remedy of the original-use purchaser is as stated above and in no event shall Ingersoll Rand® be liable for any special, direct, indirect, incidental, consequential, or other damages or expenses of any nature including, without limitation, loss of profits or production time incurred by the original-use purchaser or any other party.
