

SEEPEX.

An Ingersoll Rand Business

APPLICATIONS

The BF range pump is used for the transfer, production and coating of battery compounds in the automotive, electronics and semiconductor industries.

Overcome technical risks with the contamination-free principle of the BF range for your battery applications. Bring your Gigafactory to life: with SEEPEX, you have a reliable partner that can supply high volumes of pumps for battery applications with the best local technical support. Grow with us and equip the Gigafactories of the future.

BENEFITS

- No contamination from oil or grease
- Easy to maintain
- Clamp connections for quick installation/removal reduce maintenance time
- Dismountable rotating unit allows individual replacement
- Robust design due to flexible titanium shaft
- Easily cleaned with common solvents and de-ionized water

KEY FACTS

- Conveying capacity:
0.06 - 30 m³/h (0.26 - 132 USGPM)
- Pressure:
up to 12 bar (175 psi)
