

# SEEPEX.

An Ingersoll Rand Business

## APPLICATIONS

SEEPEX semi-submersible pumps drain containers, pits, basins and barrels. They can convey abrasive or corrosive products with thin to high viscosities. Custom-built for each application, they are easy to maintain and have low operating costs. Our semi-submersible pumps are a cost-effective alternative to other pump systems.

### FEATURES

- BE range available in four different variations for adaptation to each application
- Minimal pulsation, uniform flow
- Variable submersible depths
- Increases the available NPSH (Net Positive Suction Head)
- The pump can be installed in a “can” to further increase NPSHa for fluids with high vapor pressures
- Can be installed in a closed system to comply with environmental regulations

### KEY FACTS

- Conveying capacity:  
30 l/h–300 m<sup>3</sup>/h (0.132–1,320 USGPM)
- Pressure:  
up to 12 bar (175 psi)
